Current Status

- Revision A: Request for approval submitted.
 - Revision A incorporates the new technical manual and difference CD-ROM
- Letter of Approval and Promulgation expected in the first half of July 02.
- Revision will be disseminated to training sites via CD upon approval.

MTR Test Equipment Operator Course

- New course title incorporating ProTrack
- Awaiting direction from CNET to submit TPP (Training Project Plan)

Road Map for Change

- NAVSEA submits NTSP to CNET
- CNET directs FTC Norfolk to submit TPP
- FTC Norfolk begins writing new course and submits TPP
- CNET approves TPP

Road Map for Change (cont.)

- FTC Norfolk finishes revision and sets pilot course date.
- FTC Norfolk host pilot course with representatives from other sites.
- FTC Norfolk conducts post pilot monitoring report and submits course for approval

Road Map for Change (cont.)

- FTC Norfolk CISO approves course and issues letters of approval and promulgation.
- NUWC upgrades all stations at all training site to AN/USM-674 stations prior to implementation date.
- Training sites implement the changed Course of Instruction (COI).

Key Issues

- How do we match funding with outfitting of training sites?
- What should the timeline be for the change?

Next Steps

- Bring Revision A online.
- Make determination on timeline for change
- Acquire necessary equipment to outfit training sites
- Begin writing new Course of Instruction
